### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. William L. Brooks on July 26, 2005.

The application has been amended as follows:

In claim 1, line 19, after outer conductor," --and wherein a distance between the input and output electrodes is set such that one attenuation pole appears at a low frequency side of the pass band, and a width and depth of the groove are set such that two attenuation poles appear at a high frequency side of the pass band—has been inserted;

line 20, "to thereby allow one pass band and three attenuation poles to appear" has been deleted; and

Claim 5 has been cancelled.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The newly added limitation, "wherein a distance between the input and output electrodes is set such that one attenuation pole appears at a low frequency side of the pass band, and a width and depth of the groove are set such that two attenuation poles appear at a high frequency side of the pass band" in claim 1 is not shown or suggested by Tada et al.
